IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER MONITORING REQUIREMENTS NOT MET FOR

PWS Name CORPORATION OF HARPERS FERRY, PWSID WV 3301912

Our water system recently violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below we failed to perform the following required sampling.

What should I do?

There is nothing you need to do at this time.

The table below lists the monitoring we did not conduct, how often we are supposed to sample, how many samples we are supposed to take, how many samples we took and when the samples should have been taken.

Table with 4 columns: item, Required Monitoring, Required Monitoring Frequency, When All Samples Should Have Been Taken. Rows include Chlorine (WB), 36 MONITORING RTN/RPT MAJOR (SWTR-FILTER)-CHLORINE, 36 MONITORING ROUTINE (IESWTR/LT1) MAJOR TURBIDITY, Failure to correct significant deficiencies, and Public Notice Rule Linked to Violation.

What happened? What is being done?

items A,B,C - Expiration date of chief operator certificate entered incorrectly on MOR form(s). Templates for MOR's have been updated with correct date. item D - Deficiencies were corrected within required period with rebuild of production facility. DHHR representatives were part of project team and updated regularly; however, HFWW failed to file official notification forms. HFWW and WV DHHR regional office coordinating on filing of required notice. item E - Waited too long to act upon violation in Item D in order to meet Public Notice deadline. Acting to clear this violation immediately upon receipt.
